**Security and Safety in the Era of Global Risks**  
Radomir Compel 2021-07-29 The concept of risk in global life has not been fully understood and explored and this book attempts to examine what it entails in the fast changing, interconnected and complex world. As a foundational component of safety systems, risk has been considered relatively simple, predictable, and therefore, assessable and manageable phenomenon. Social and political sciences prefer the terminology of security to capture the dimension of risk which is more complex and more consequential to survival. Risk has become more human-made and intentional today, and this book explores innovative approaches and engages in theoretical and policy debates to capture its political and security dimensions.

**How Healthcare Data Privacy Is Almost Dead ... and What Can Be Done to Revive It!**  
John J. Trinckes, Jr. 2017-01-27 The healthcare industry is under privacy attack. The book discusses the issues from the healthcare organization and individual perspectives. Someone hacking into a medical device and changing it is life-threatening. Personal information is available on the black market. And there are increased medical costs, erroneous medical record data that could lead to wrong diagnoses, insurance companies or the government data-mining healthcare information to formulate a medical ‘FICO’ score that could lead...
to increased insurance costs or restrictions of insurance. Experts discuss these issues and provide solutions and recommendations so that we can change course before a Healthcare Armageddon occurs.

**Literature Reviews in Support of the Middle Level Education Research Agenda**

Steven B. Mertens

2018-04-01

In 2015-16, the Middle Level Education Research Special Interest Group (MLER SIG), an affiliate of the American Educational Research Association, undertook a collaborative project—the development of a new middle grades education research agenda. The purpose of the MLER SIG Research Agenda (Mertens et al., 2016) was to develop a set of questions that would guide the direction of middle grades education research. Ideally, this Research Agenda would serve to prompt discourse and generate research projects that could contribute to the middle grades knowledge base. Members of the MLER SIG identified eight research areas: (a) young adolescent development, (b) cultural responsiveness, (c) special populations, (d) educator development, (e) curriculum, (f) social and emotional learning, (g) digital technologies, and (h) school structures. This volume contains the extensive literature reviews and subsequent research questions for each of the research topics.

**Our Veterans**

Suzanne Gordon 2022-06-24

In Our Veterans, Suzanne Gordon, Steve Early, and Jasper Craven explore the physical, emotional, social, economic, and psychological impact of military service and the problems that veterans face when they return to civilian life. The authors critically examine the role of advocacy organizations, philanthropies, corporations, and politicians who purport to be “pro-veteran.” They describe the ongoing debate about the cost, quality, and effectiveness of healthcare provided or outsourced by the Department of Veterans Affairs (VA). They also examine generational divisions and political tensions among veterans, as revealed in the tumultuous events of 2020, from Black Lives Matter protests to the Trump-Biden presidential contest. Frank and revealing, Our Veterans proposes a new agenda for veterans affairs linking service provision to veterans to the quest for broader social programs benefiting all Americans.

**The Routledge Handbook of Financial Literacy**

Gianni Nicolini 2021-12-31

Financial literacy and financial education are not new topics, even though interest in these topics among policymakers, financial authorities, and academics continues to grow. The Routledge Handbook of Financial Literacy provides a comprehensive reference work that addresses both research perspectives and practical applications to financial
education. This is the first volume to summarize the milestones of research in financial literacy from multiple perspectives to offer an overview. The book is organized into six parts. The first three parts provide a conceptual framework, which discusses what financial literacy is, how it should be measured, and explains why it represents a relevant topic and effective tool in enhancing decision-making among consumers as well as consumer protection strategies. Part IV addresses the connection between financial education and financial literacy, with chapters about financial education in school settings as well as for adults. This part includes an analysis of the role of Fintech and the use of gamification in financial education. Part V is a collection of contributions that analyze financial literacy and financial education around the world, with a focus on geographical areas including the U.S., South America, Western Europe, Eastern Europe, Asia, and Africa. This part also considers how financial literacy should be addressed in the case of Islamic finance. The concluding part of the book examines how financial literacy is related to other possible approaches to consumer finance and consumer protection, addressing the relationships between financial literacy and behavioral economics, financial well-being, and financial inclusion. This volume is an indispensable reference for scholars who are new to the topic, including undergraduate and graduate students, and for experienced researchers who wish to enrich their knowledge, policymakers seeking a broader understanding and an international perspective, and practitioners who seek knowledge of best practices as well as innovative approaches.

Handbook of Research on Promoting Social Justice for Immigrants and Refugees Through Active Citizenship and Intercultural Education
Barreto, Isabel María Gómez 2021-06-11
Migration movements have been a constant in the societies of the past, as well as in postmodern society. However, in the past ten years, the increase in political, economic, and religious conflict amongst nations; the increase of the poverty index; and many and various natural disasters have duplicated the forced displacement of millions of people across the seven continents of the planet. This situation brings important challenges in terms of the vulnerability, inequity, and discrimination that certain peoples suffer. Professionals from the fields of the social sciences, education, psychology, and international law share the fact that education represents an opportunity for children and young migrants to become members with full rights in the societies they arrive in. Empirical studies show that the implementation of the right to education for migrants presents some challenges and dilemmas to the governments of host countries and more
specifically to the education centers, NGOs, universities, and the professionals working in them, hence the need for more research on these issues of immigration, refugees, social justice, and intercultural education. The Handbook of Research on Promoting Social Justice for Immigrants and Refugees Through Active Citizenship and Intercultural Education provides visibility to issues such as the increase in migration and displacement and the difficulties in political agreements, educational contexts, and in cultural issues, stigmatization, vulnerability, social exclusion, racism, and hatred amongst host communities. This book gives possible solutions to this current complex situation and helps foster and promote sensitivity, perspective, and critical thinking for a respectful and tolerant coexistence and promotion of equity and social justice. The chapters promote cultural diversity and inclusion in classrooms by offering knowledge, strategies, and research on organizational development for educational institutions and multicultural environments. This book is essential for administrators, policymakers, leaders, teachers, practitioners, researchers, academicians, and students interested in the promotion of social justice in education for immigrants and refugees.

Collaborative Cyber Threat Intelligence Florian Skopik 2017-10-16 Threat intelligence is a surprisingly complex topic that goes far beyond the obvious technical challenges of collecting, modelling and sharing technical indicators. Most books in this area focus mainly on technical measures to harden a system based on threat intel data and limit their scope to single organizations only. This book provides a unique angle on the topic of national cyber threat intelligence and security information sharing. It also provides a clear view on ongoing works in research laboratories world-wide in order to address current security concerns at national level. It allows practitioners to learn about upcoming trends, researchers to share current results, and decision makers to prepare for future developments.

The Iran National Front and the Struggle for Democracy Masoud Kazemzadeh 2022-05-09 The Iran National Front and the Struggle for Democracy: 1949–Present explores the activities of the Iran National Front (INF). The INF is a coalition of parties, groups, and individuals and Iran’s oldest and main pro-democracy political party. This book presents a political history of the INF from 1949 to the present day. It discusses the current platform of the INF, its leadership, policies, strategies, as well as criticisms and weaknesses. The volume draws on a rich range of primary sources, INF documents, and interviews, including translated transcripts with the top leader of the INF. As it is one of the major
political parties opposing the current regime in Iran, the book also examines the current situation in the country. It provides an analysis of the nature of the political systems under the Shah and the Islamic Republic.

**Innovation and Disruption at the Grid’s Edge**
Fereidoon P. Sioshansi 2017-05-10

Innovation and Disruption at the Grid’s Edge examines the viable developments in peer-to-peer transactions enabled by open platforms on the grid’s edge. With consumers and prosumers using more electronic platforms to trade surplus electricity from rooftop solar panels, share a storage battery, or use smart gadgets that manage load and self-generation, the grid’s edge is becoming crowded. The book examines the growing number of consumers engaging in self-generation and storage, and analyzes the underlying causes and drivers of change, as well as the implications of how the utility sector—particularly the distribution network—should/could be regulated. The book also explores how tariffs are set and revenues are collected to cover both fixed and variable costs in a sustainable way. This reference is useful for anyone interested in the areas of energy generation and regulation, especially stakeholders engaged in the generation, transmission, and distribution of power. Examines the new players that will disrupt the energy grid markets Offers unique coverage of an emerging and unpublished topic Helps the reader understand up-to-date energy regulations and pricing innovations

**Human Health and the Climate Crisis**
Gail Carlson 2022-01-03

Human Health and the Climate Crisis offers a detailed exploration of the human health aspects of climate change, examining both the direct and indirect human health impacts of climate change while uniquely exploring climate justice -- the equitable protection of all people from climate impacts and the participation of all people in climate-related decision-making regardless of race/ethnicity, class, national origin, indigenous status and gender. This comprehensive, yet accessible text balances appropriate technical content with sufficient contextual information about public health, epidemiology, and climate modeling for students to be able to comprehend the scientific literature on health impacts.

**Behind the Curtain**
Jeff Reynolds 2019-02-26

You’re probably familiar with George Soros. You may be familiar with Tom Steyer. You may even know who their other billionaire buddies are on the Left, and which foundations they use to exert political pressure. But do you know how they organize their dollars and their organizations to have maximum impact, while shielding themselves from voter scrutiny and criminal
charges? Behind the Curtain is a look into the murky world of dark money—massive amounts of it aligned to push a far-left agenda that would make even mainstream liberals shiver. Behind the Curtain reveals the sordid web of limousine liberals and subversive billionaires in a chilling tale of power, greed, envy, and the politics of personal destruction. It is also the story of the lengths to which the organized Left will go to overturn the results of the 2016 election using the courts, a shadowy network of nonprofit organizations and consulting firms, and an increasingly compliant media.

Identity and Internationalization in Catholic Universities  
Hans de Wit 2018-08-02  
Identity and Internationalization in Catholic Universities explores the relationship between Catholic identity, mission (with special emphasis on Jesuit and La Salle universities), and internationalization in Catholic universities of different types and located in different contexts: Latin America, Asia-Pacific and Europe.

Locked In  
John Pfaff 2017-02-07  
"Pfaff, let there be no doubt, is a reformer...Nonetheless, he believes that the standard story—popularized in particular by Michelle Alexander, in her influential book, The New Jim Crow—is false. We are desperately in need of reform, he insists, but we must reform the right things, and address the true problem."—Adam Gopnik, The New Yorker  

A groundbreaking examination of our system of imprisonment, revealing the true causes of mass incarceration as well as the best path to reform In the 1970s, the United States had an incarceration rate comparable to those of other liberal democracies—and that rate had held steady for over 100 years. Yet today, though the US is home to only about 5 percent of the world's population, we hold nearly one quarter of its prisoners. Mass incarceration is now widely considered one of the biggest social and political crises of our age. How did we get to this point? Locked In is a revelatory investigation into the root causes of mass incarceration by one of the most exciting scholars in the country. Having spent fifteen years studying the data on imprisonment, John Pfaff takes apart the reigning consensus created by Michelle Alexander and other reformers, revealing that the most widely accepted explanations—the failed War on Drugs, draconian sentencing laws, an increasing reliance on private prisons—tell us much less than we think. Pfaff urges us to look at other factors instead, including a major shift in prosecutor behavior that occurred in the mid-1990s, when prosecutors began bringing felony charges against arrestees about twice as often as they had before. He describes a fractured criminal justice system, in which counties don't pay for the people they send to state prisons, and in which white suburbs set...
law and order agendas for more-heavily minority
cities. And he shows that if we hope to
significantly reduce prison populations, we have
no choice but to think differently about how to
deal with people convicted of violent crimes—and
why some people are violent in the first place. An
authoritative, clear-eyed account of a national
catastrophe, Locked In transforms our
understanding of what ails the American system
of punishment and ultimately forces us to
reconsider how we can build a more equitable
and humane society.

Global Health Watch 5 People’s Health
Movement 2017-12-15 For over a decade, Global
Health Watch has been the definitive source for
alternative analysis on health. This new edition
addresses the key challenges facing governments
and health practitioners today, within the context
of rapid shifts in global governance mechanisms
and the UN’s Sustainable Development Goals.
Like its predecessors, it challenges conventional
wisdom while pioneering innovative new
approaches to the field. Collaboratively written by
academics and activists drawn from a variety of
movements, research institutions and civil society
groups, it covers some of the most pressing
issues in world health, from the resurgence of
epidemic diseases such as Ebola to the crisis in
the WHO, climate change and the ‘war on drugs’.
Combining rigorous analysis with practical policy

suggestions, Global Health Watch 5 offers an
accessible and compelling case for a radical new
approach to health and healthcare across the
world.

Fragile States in the Americas Jonathan D.
Rosen 2016-12-07 This book examines fragile

organized crime, drug trafficking, and other major
security-related issues.

Push Back Judith Large 2016-12-15 In 2009, after
decades of conflict, the Sri Lankan government
proclaimed the decisive defeat of the Liberation
Tamil Tigers of Elam. Subsequently, the state
proved resistant to attempts by the UN and other
international bodies to promote post-war
reconciliation or reform. In this incisive new work,
Judith Large investigates the ways in which the
Rajapaksa government was able to subvert
international diplomatic efforts, as well as
exploring the wider context of rising Sinhalese
nationalism, the attendant growth of discrimination
against minorities, and efforts by both the
diaspora and citizens within Sri Lanka to work
towards a positive peace. Push Back is vital
reading not only for those interested in Sri Lanka,
but also for those concerned about the wider
implications of the conflict for human rights,
peace-making, and geopolitics.

The strength, durability, availability, and the cost effectiveness of containers as building material has made these types of homes popular in recent years. When you buy a container, it might appear as hollow boxes with no windows or openings. However, these boxes are highly customizable; they can be stacked and welded together to create beautiful yet economical homes. The next section is about the pros and cons of living in a shipping container home.

Business-State Relations under PT Governments Stefanie Tomé Schmitt 2022-02-21 During the Partido dos Trabalhadores (PT) – Workers Party, Governments in Brazil, non-electoral and extra-parliamentary political participation grew significantly. Both Lula and Rousseff used an increasing number of mechanisms of participation, known in Portuguese as órgãos colegiados – "collegiate bodies", for democratizing political decisions. Stefanie Tomé Schmitt's book addresses the impacts of participatory policy-making on business-state relations under the New Developmentalism. Her research uncovers business participation in 125 collegiate bodies based on data collected with the
peak sectoral corporatist business associations of agriculture, commerce, industry and financial services. It discloses a formalized pattern of business politics linked to the use of Corporatist Institutions, exposing a gap between Political Sociology and Political Economy approaches to interest representation in Brazil. In joining the rule configuration assessment with a process tracing of participatory policy-making in employment, innovation, and biodiversity, her investigation also reveals that engendering a more formalized pattern of business politics relied on more than choices of institutional design promoting business inclusiveness: it was contingent on business and government commitment building within mechanisms of participation and in related policy networks.

**Competition Law in Serbia** Tijana Kojović
2017-06-26 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in the Serbia covers every aspect of the subject – the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities’ powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the Serbia will welcome this very useful guide, and academics and researchers will
appreciate its value in the study of international and comparative competition law.

Whitewash Carey Gillam 2017-10-10 Rachel Carson Environment Book Award, First Place (2017) "Reads like a mystery novel as Gillam skillfully uncovers Monsanto's secretive strategies."--Erin Brockovich "A damning picture...Gillam expertly covers a contentious front." --Publishers Weekly "A must-read." -- Booklist "Hard-hitting, eye-opening narrative." -- Kirkus In Whitewash, veteran journalist Carey Gillam uncovers one of the most controversial stories in the history of food and agriculture. Gillam explores the global debate over the safety of a herbicide so pervasive that it is found in our cereals, snacks, and even in our urine. Known as Monsanto's Roundup by consumers and as glyphosate by scientists, the world's most popular weed killer is sold as safe enough to drink, but Gillam's research shows that message has been carefully crafted to conceal a host of dangers. Whitewash is more than an exposé about the hazards of one chemical. It's a story of power, politics, and the deadly consequences of putting corporate interests ahead of public safety.

African Border Disorders Olivier J. Walther 2017-09-01 Since the end of the Cold War, the monopoly of legitimate organized force of many African states has been eroded by a mix of rebel groups, violent extremist organizations, and self-defence militias created in response to the rise in organized violence on the continent. African Border Disorders explores the complex relationships that bind states, transnational rebels and extremist organizations, and borders on the African continent. Combining cutting edge network science with geographical analysis, the first part of the book highlights how the fluid alliances and conflicts between rebels, violent extremist organizations and states shape in large measure regional patterns of violence in Africa. The second part of the book examines the spread of Islamist violence around Lake Chad through the lens of the violent Nigerian Islamist group Boko Haram, which has evolved from a nationally-oriented militia group, to an internationally networked organization. The third part of the book explores how violent extremist organizations conceptualize state boundaries and territory and, reciprocally, how do the civil society and the state respond to the rise of transnational organizations. The book will be essential reading for all students and specialists of African politics and security studies, particularly those specializing on fragile states, sovereignty, new wars, and borders as well as governments and international organizations involved in conflict prevention and early intervention in the region.

The role of livestock in food security, poverty
reduction and wealth creation in West Africa. Food and Agriculture Organization of the United Nations 2020-07-01 With the objective of gaining a better insight into the challenges and opportunities of the livestock sub-sector in West Africa, FAO has conducted several studies and held various workshops in recent years. The outcomes of these studies and workshops conducted between 2009 and 2014 were published and distributed as hard copy reports and disseminated as on-line publications. These reports included topics such as value chains, cross-border transhumance, animal feed resources, priority animal diseases, among others, were informative in their own right. Still, the fact that they targeted specific areas of livestock in a fragmented manner did not address the need of readers whose wish was to have a comprehensive understanding of the livestock sector in West Africa. It is in response to this demand for a comprehensive outlook of the West African Livestock sub-sector that different reports and studies have been compiled into this one book. The book has twelve chapters, covering almost all aspects of livestock in the region. Attempts were made to enrich the information provided by including eight short case studies focusing on different aspects of the livestock sub-sector in West Africa. The book attempts to fill the gap of a need for comprehensive information on the potential, performance, challenges, and prospects of the livestock sub-sector in West Africa.

Simpson's Forensic Medicine, 14th Edition Jason Payne-James 2019-10-16 Prestigious and authoritative, this fully updated fourteenth edition of Simpson's Forensic Medicine remains a classic; one of the world's leading introductory texts in the field of forensic medicine. It presents all that the generalist or student needs to know about the interface between medicine and the law.

Like mother, like daughter? Armstrong, Jill 2017-10-04 Women are encouraged to believe that they can occupy top jobs in society by the example of other women thriving in their careers. Who better to be a role model for career success than your mother? Paradoxically, this book shows that having a mother as a role model, even for graduates of top universities, does not predict daughters progressing in their own careers. It finds that mothers with careers, whilst highly influential in their daughters' choice of career path, rarely mentor their daughters as they progress. This is partly explained by ‘quiet ambition’ – the tendency of women to be modest about their achievements. Bigger issues are the twin pressures from contemporary motherhood and workplace culture that ironically lead career women’s daughters to believe that being a ‘good
mother’ means working part-time. This stalls career progress. Based on a large, cross-generational qualitative sample, this book offers a timely and original perspective on the debate about gender equality in leadership positions.

**Canadian Foreign Policy** Brian Bow 2020-11-01

Canadian Foreign Policy, as an academic discipline, is in crisis. Despite its value, CFP is often considered a “stale and pale” subfield of political science with an unfashionably state-centred focus. Canadian Foreign Policy asks why. Practising scholars investigate how they were taught to think about Canada and how they teach the subject themselves. Their inquiry shines a light on issues such as the casualization of academic labour and the relationship between study and policymaking. This nuanced collection offers not only a much-needed assessment of the boundaries, goals, and values of the discipline but also a guide to its revitalization.

**Marketing Renewable Energy** Carsten Herbes 2017-06-23

This book answers questions such as: How do you market green electricity or biomethane? What is the right price for renewable energy? How do the legal framework and customer preferences influence marketing strategies? Is direct marketing or online marketing the key to success? Answers to these and many other questions can be found in this volume, which gathers contributions from leading researchers and respected practitioners. Employing an easy-to-follow, clearly structured format, it combines the latest research results and concrete case studies to help readers understand the fundamentals of marketing for renewable energies and new business models from different countries.

**Representing the Contemporary North American Family** Sophie Chapuis 2021-08-06

The rise in individualism and the growing liberalism of family law may be seen as potential threats to the family as a unit. Currently, defenders of traditional family models are being forced to accept a more fluid definition of family as an intrinsic heterogeneous unit. Central to this book is the idea that the family, as a social unit around which society is structured, still plays a pivotal role in North America. States, courts, and political parties have had to address the major mutations of the family landscape in the last decades. The family is instrumental in reorganizing communities in migration contexts, and is a key component of political strategies. The way family is staged in the press, on social media, and in TV shows, reflects the fast-changing patterns and new realities of North American families, and offers
alternatives to hegemonic representations of normative families. It also ranks high among current literary obsessions since it is the privileged receptacle for contemporary anxieties and operates both as an ideal retreat or an alienating space. The proliferation of family narratives, in their ever-shifting forms, reveals that family has boundless potential for fiction, and continues to run deep in the North American imaginary. This book gathers together approaches that range from field study, sociology, politics, media studies and literature. The contributions here show the centrality of the family both as an individual unit and as social, political, legal, and fictional constructs.

**Beyond Shifting Wealth Perspectives on Development Risks and Opportunities from the Global South**

OECD 2017-03-28 Emerging and developing countries have grown faster than advanced countries since the 2000s. This shifting weight of global economic activity from 'the West' to 'East and South' is referred to as “shifting wealth”. **Pacifying the Homeland**

Brendan McQuade 2019-08-06 The United States has poured over a billion dollars into a network of interagency intelligence centers called “fusion centers.” These centers were ostensibly set up to prevent terrorism, but politicians, the press, and policy advocates have criticized them for failing on this account. So why do these security systems persist? Pacifying the Homeland travels inside the secret world of intelligence fusion, looks beyond the apparent failure of fusion centers, and reveals a broader shift away from mass incarceration and toward a more surveillance- and police-intensive system of social regulation. Provided with unprecedented access to domestic intelligence centers, Brendan McQuade uncovers how the institutionalization of intelligence fusion enables decarceration without fully addressing the underlying social problems at the root of mass incarceration. The result is a startling analysis that contributes to the debates on surveillance, mass incarceration, and policing and challenges readers to see surveillance, policing, mass incarceration, and the security state in an entirely new light.

**Routledge Handbook of Indigenous Peoples in the Arctic**

Timo Koivurova 2020-12-03 This handbook brings together the expertise of Indigenous and non-Indigenous scholars to offer a comprehensive overview of issues surrounding the well-being, self-determination and sustainability of Indigenous peoples in the Arctic. Offering multidisciplinary insights from leading figures, this handbook highlights Indigenous challenges, approaches and solutions to pressing issues in Arctic regions,
such as a warming climate and the loss of biodiversity. It furthers our understanding of the Arctic experience by analyzing how people not only survive but thrive in the planet’s harshest climate through their innovation, ingenuity and agency to tackle rapidly changing environments and evolving political, social, economic and cultural conditions. The book is structured into three distinct parts that cover key topics in recent and future research with Indigenous Peoples in the Arctic. The first part examines the diversity of Indigenous peoples and their cultural expressions in the different Arctic states. It also focuses on the well-being of Indigenous peoples in the Arctic regions. The second part relates to the identities and livelihoods that Indigenous peoples in Arctic regions derive from the resources in their environments. This interconnection between resources and people’s identities underscores their entitlements to use their lands and resources. The third and final part provides insights into the political involvement of Indigenous peoples from local all the way to the international level and their right to self-determination and some of the recent related topics in this field. This book offers a novel contribution to Arctic studies, empowering Indigenous research for the future and rebuilding the image of Indigenous peoples as proactive participants, signaling their pivotal role in the co-production of knowledge. It will appeal to scholars and students of law, political sciences, geography, anthropology, Arctic studies and environmental studies, as well as policy-makers and professionals.

Grievous Religious Persecution Werner Nicolaas Nel 2020-12-29 “Nel focuses on grievous religious persecution as one manifestation of crimes against humanity. In spite of shocking reports in recent years about mass-scale atrocities, the issue of religious persecution so far has received comparatively limited attention in academic literature. By meticulously putting together the various elements that jointly define religious persecution, Nel’s dissertation fills a frequently felt gap. Moreover, he reminds us that humanity cannot remain silent about manifestations of grievous religious persecution, which after all are crimes against humanity as a whole. International criminal law must be applied to overcome the gloating triumph of perpetrators over their victims.” From the foreword by Prof. Dr. Heiner Bielefeldt, former U.N. Special Rapporteur on freedom of religion or belief

The Eyes of the Skin Juhani Pallasmaa 2012-05-14 First published in 1996, The Eyes of the Skin has become a classic of architectural theory. It asks the far-reaching question why, when there are five senses, has one single sense – sight – become so predominant in architectural
culture and design? With the ascendancy of the digital and the all-pervasive use of the image electronically, it is a subject that has become all the more pressing and topical since the first edition’s publication in the mid-1990s. Juhani Pallasmaa argues that the suppression of the other four sensory realms has led to the overall impoverishment of our built environment, often diminishing the emphasis on the spatial experience of a building and architecture’s ability to inspire, engage and be wholly life enhancing. For every student studying Pallasmaa’s classic text for the first time, The Eyes of the Skin is a revelation. It compellingly provides a totally fresh insight into architectural culture. This third edition meets readers’ desire for a further understanding of the context of Pallasmaa’s thinking by providing a new essay by architectural author and educator Peter MacKeith. This text combines both a biographical portrait of Pallasmaa and an outline of his architectural thinking, its origins and its relationship to the wider context of Nordic and European thought, past and present. The focus of the essay is on the fundamental humanity, insight and sensitivity of Pallasmaa’s approach to architecture, bringing him closer to the reader. This is illustrated by Pallasmaa’s sketches and photographs of his own work. The new edition also provides a foreword by the internationally renowned architect Steven Holl and a revised introduction by Pallasmaa himself. Cities around the World: Struggles and Solutions to Urban Life [2 volumes] Jing Luo 2019-07-31 This two-volume set offers a comprehensive overview of major challenges faced by cities worldwide in the 21st century, and how cities in different geographic, economic, and political conditions are finding solutions to them. • Offers students more than a simple A–Z encyclopedia of the world's major cities by delving deep into the issues that these urban centers face • Includes approximately 100 entries on a multitude of issues in a variety of cities around the world, from Abu Dhabi to Zurich • Includes photographs to help to illuminate and provide visual support to the text • Features entries written by more than 30 scholars with backgrounds in a variety of disciplines, contributing to a well-rounded, comprehensive text

Sustainability Reporting in Central and Eastern European Companies Péter Horváth 2017-06-12
This collection of expert articles highlights the standards and practices concerning sustainability reporting among companies in Central and Eastern Europe (CEE). Due to the growing
interest in corporate social responsibility issues, sustainability reporting has become increasingly common among businesses that claim to adhere to certain social, environmental and economic standards. While it can be observed that sustainability reporting is widely practiced in Western and Northern European countries, only few studies have been conducted on this topic in the CEE region. Drawing on a major empirical study involving researchers from 10 different CEE countries, this book addresses the status quo of sustainability reporting, outlines future prospects and provides essential recommendations for practitioners.

Photographic Warfare  Kareem El Damanhoury 2022-08-15 Photographic Warfare explores the processes of visual contestation at work in the competing official media campaigns of state forces and militant, nonstate actors in the online environment. Islamist and far-right militant groups are increasingly weaponizing their visual media by displaying their actions—beheadings, trainings, fighting on the battlefield, services provision to locals, and so on—as spectacles that circulate around the globe to challenge statebased media messaging and policy agendas. In response, numerous states and coalitions have expanded their online media presence to counter such threats. Using the conflict between ISIS and the Egyptian state over the Sinai Peninsula as a case study, Kareem El Damanhoury introduces an analytical framework of visual contestation to guide future studies of competing visual media campaigns in the online environment. The proposed model provides a rubric for dissecting and understanding contemporary photographic warfare using visual framing, semiotic analysis, contextual interpretations, and comparative applications. Photographic Warfare further emphasizes the many situational factors that influence visual output and content, including militant attacks, counterterrorism operations, loss of leaders, and introduction of new groups into the battlefield.

Against Doom  Jeremy Brecher 2017-04-15 While the world's people suffer the apocalyptic torments of floods, fires, droughts, heatwaves, desertification, disease vectors, food shortages, forced migration, ecosystem collapse, extinction, and other effects of uncontrolled climate change, the world's governmental and political leaders continue to accelerate our wild ride to climate doom. Is there any way for the rest of us to put on the brakes? Climate insurgency is a strategy for using people power to realize our common interest in protecting the climate. It uses mass, global, nonviolent action to challenge the legitimacy of public and corporate officials who are perpetrating climate destruction. A global climate insurgency has already begun. It has the
potential to halt and roll back the fossil fuel agenda and the global thrust toward climate destruction. Against Doom: A Climate Insurgency Manual tells how to put that strategy into action—and how it can succeed. It is a handbook for halting global warming and restoring our climate—a how-to for climate insurgents.

Anatomy of a False Confession Michael D. Cicchini, JD 2018-10-29 Anatomy of a False Confession goes inside the interrogation room and explains how government agents got Brendan Dassey to falsely confess to murder; how the prosecutor used that confession to win a conviction; why the conviction was reversed (and why the reversal was later reversed); and how the law should be reformed to avoid future injustices.

Betrayal Bond, Revised Patrick J. Carnes, PhD 2018-08-17 Some really great books just keep getting better! For seventeen years The Betrayal Bond has been the primary source for therapists and patients wrestling the effects of emotional pain and harm caused by exploitation from someone they trusted. Divorce, litigation, incest and child abuse, domestic violence, kidnapping, professional exploitation and religious abuse are all areas of trauma bonding. These are situations and relationships of incredible intensity or importance lend themselves more easily to an exploitation of trust or power. In The Betrayal Bond, Dr. Carnes presents an in-depth study of these relationships; why they form, who is most susceptible, and how they become so powerful. Dr. Carnes also gives a clear explanation of the bond that compels people to tolerate the intolerable, and for the first time, maps out the brain connection that makes being with hurtful people comparable to 'a drug of choice.' Most importantly, Carnes provides practical steps to identify compulsive attachment patterns and ultimately to change or end them for good. This new edition includes: New science for understanding how our brains can make a prison of bad relationships New assessments and insights based on 50,000 research participants A new section utilizing the latest findings in attachment research and narrative therapy to concretely rewrite and rescript bad experiences A redefinition of the factors contributing to addictive relationships.
